Located directly on the main road leading from Châteauneuf-du-Pape to Avignon, this majestic Château dominates the valley. For five generations, the same family has been dedicated to farming this property while respecting the authentic tradition of the area. The vineyard consists of 45 hectares situated on a stone terrace made of large stones. These pebbles range in size from two to six inches and were rounded years ago during the Ice Age. The pebbles collect the heat during the day and reflect it during the night, causing the production of big, full-bodied, and generous wines, with a delicate bouquet and elegance, unique in the world. Our old vines (some are one hundred years old) and the thirteen varietals of the appellation, largely contribute to the undisputed elegance and nose of this wine.
