D.O. VALLE CENTRAL  
CHILE

SAUVIGNON BLANC

---

---

Chile is a popular New World wine growing region for good reason. The wide diversity of soils allows for different varietals to grow in ideal conditions. The white varietals produce fresh tasting wines with good acidity, crisp finishes, all well balanced and smooth.

---

This Sauvignon Blanc has a soft yellow greenish color with an elegant aroma of citrus tree blossom. This vivacious and refreshing wine is ideal as an aperitif. It also pairs well with seafood.
